Submit Patent Applications & Manage Patent Prosecution Histories with Ease

“We can submit all types of patent applications to USPTO get visibility to patent prosecution office actions and be on top of responses by tracking file histories.”

Senior Director & Head of IP Department

Challenge

Accelerate Patent Submissions & Manage Prosecutions

Key challenge is to automate and accelerate patent submissions online to USPTO EFS-Web and manage patent prosecutions and integrate image file wrappers to patent portfolio to track & manage patent prosecution histories and quickly respond to Office actions and increase productivity.

IP Executives, Managers and In-house Patent Counsels needed to:

- Submit patent applications online to patent office
- Reduce Costs
- Manage Patent Prosecution life cycle
- Track & manage Office Actions & Responses
- Provide prosecution status

Solution

Automate Patent Submissions

PatentTrak integrated PatFolio and USPTO EFS-Web and enabled to submit the drafted patent applications online as registered filer, manage patent prosecution, submit responses to office actions, download image file wrappers and keep patent prosecution history in PatFolio up to date. As a result, improved efficiency, eliminated manual interaction to large extent and automating key functions and provided IP Executives instant visibility & deep insights into patent prosecution.

Results

Accelerating Patent Application Submissions & Providing Prosecution Insights

The company was able to automate patent applications online to patent office, and proactively track all office actions & responses for each patent application. The company also managed patent file histories and integrated with PatFolio to provide management with instant visibility to patent prosecution status on each patent and improve productivity and efficiency.
