

Big Data driven Pintels Patent Examiner Analytics

Actionable Intelligence to execute patent prosecution strategies and improve Allowance Rates

Challenges

For most innovative companies, effective patent prosecution strategies are critical to business success. Innovation success depends on protecting the innovative technologies and revenue streams therein.

Patent prosecution is expensive affair. So, formulating data driven, facts based, thoughtful patent prosecution strategies on how to handle, lay down the plan of action and options to pursue in getting all patent issuance is critical for business success. So, leveraging IP legal patent examiner analytics is a natural fit for your organization.

Another significant challenge for patent attorneys is to craft effective strategies how to understand and analyze behavior of patent examiner and art units. Also, deciding which law firm to go with, what is its track record is another big open question to deal with.

Key Benefits

- Analyze behavior of patent examiner
- Analyze behavior of art units
- Help improve consistency
- Track and understand Request for Continued Examination (RCE's) and patterns
- Identify patent examiner biases
- View patent examiner metrics
- Assist Law firms with business development
- Identify frequency with which patent examiner allows claims

Why Pintels Patent Examiner Analytics?

Big data driven Pintels Patent Examiner Analytics provide actionable intelligence to formulate and execute patent prosecution strategies to improve the allowance rates. Patent prosecution attorneys and intellectual property specialists can formulate winning patent prosecution strategies at multiple levels – Application level, Portfolio level and Strategy level and deliver successful patent prosecutions and issuances. Leveraging the predictive analytics capabilities to reshape patent prosecution.

Pintels Patent Examiner Analytics helps you successfully execute patent strategies and gain competitive advantage. The deep insights from analytics and data visualizations and point-and-click visualizations help you understand the behavior of patent examiners and art units. It also helps you improve consistency and assists law firms with business development.

The analytics can be leveraged by companies as well as Law firms to:

- Add business value
- Gain competitive advantage
- View Patent Examiner Data Visualizations, Metrics and Outcomes
- Identify, analyze behavior of patent examiners
- Assess allowance rates by patent examiners, art units and disposition rates
- Leverage analytics to reshape patent prosecution strategies

Takeaways

Leveraging Pintels Patent Examiner Analytics empowers to know facts on ground with patent examiners, art units for better positioning and formulating effective patent prosecution strategy and build high value patent portfolio. Patent strategists can now formulate winning strategies at multiple levels.

Analysis of the IP backed securitization transactions provides insights into some of the impeding factors.

- **Application level:** leverage data to decide on how to respond to an office action.
- **Portfolio level:** leverage data to identify trends and portfolio segments, technology fields, sub-technology fields that need attention.
- **Strategy level:** leverage data to identify empirical metrics associated with specific prosecution strategies.

Leveraging the combination of these strategies empowers patent prosecution attorneys understand patent examiners well and to formulate, execute patent strategies to improve allowance rates, reduce disposition times and effectively build high value patent portfolio.
