IPWayz for Pro Bono Automation

Achieve End-to-end Process flow automation
Accelerate Innovations from Lab to Market and
Foster Growth

Introduction

IPWayz for USPTO Pro Bono Program automation solution helps you achieve end-to-end automation of pro bono processes and manage entire system with maximum efficiency.

Leveraging USPTO Pro Bono Program solution, independent inventors and start-ups can expedite their applications and fast track their innovations from lab to marketplace and bring out the innovations faster into the market, and accelerate growth.

Why IPWayz?

Powered by IPWayz™, the pro bono automation solution allows independent inventors, start-ups to fast track the patent application requests and also allows patent attorneys to manage their case dockets, and patent prosecution lifecycle accelerating the overall process and providing quicker time to value.

- Expedite patent application requests

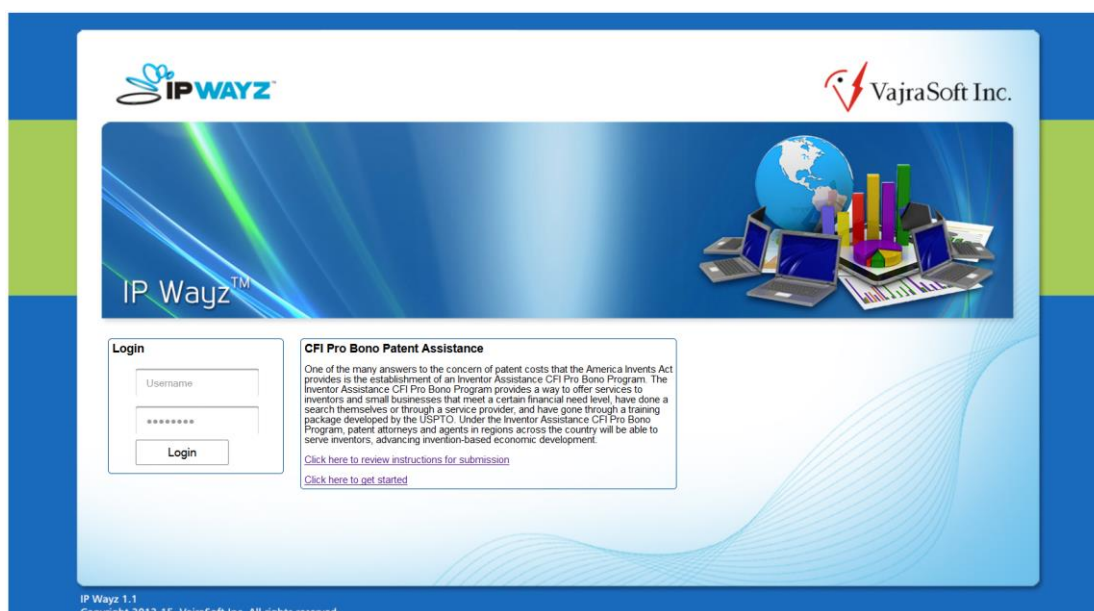

- Manage all independent inventors, patent attorneys and related patent applications
- Automation tools to fast track preparing, drafting, filing and prosecution of patent applications
- Generate data visualization, reports

You can manage and track all patent applications that are being processed at the program center. You can generate reports on regular basis and provide periodic status to USPTO.

Benefits

- Expedite patent application requests
- Quickly prepare patent applications for filing
- Manage patent prosecution with ease
- Reduce operational overheads
- Increase business efficiency
- Accelerate innovations from lab to market
